### Work Experience

---

#### Business Analyst

Apr 2023 – Present

#### Delphi Technology, Toronto, Canada (Remote)

- Supported project managers and business stakeholders throughout the entire project life cycle, effectively communicating changes, enhancements, and modifications.
- Gather requirements via brainstorming, questionnaires with stakeholders, competitive product analysis, and workflow analysis.
- Categorize requirements as user requirements, technical requirements and UI requirements.
- Developed and maintained project documentation including Business Requirements Document (BRD) and Functional Requirements Document (FRD).
- Translated technical documents into understandable language for non-technical stakeholders, facilitating effective collaboration.
- Generated process flows and business regulations, converting business needs into technical solutions using UML diagrams like Use Case, Activity, and Sequence diagrams.
- Illustrated requirements through the creation of screen prototypes, wireframes, and UI designs.
- Collaborated with the Product Owner to transform Business requirements into Epics and User Stories.
- Provided implementation guidance and training to end-users.
- Acted as a bridge between the client and the technical development team.

#### Junior Business Analyst

Feb 2022 – Jan 2023

#### Micronics Technologies India Private Limited, India

- Communicate with clients through E-mail/Skype or through any other medium and finalize the scope of the project.

- Experience in wireframe, website flow creation, documentation, FRD and flow charts creation.
- To visualize how end user will feel about the project, work closely with designer to visualize the requirements by creating graphical prototypes and wireframes.
- Mockup presentation to the business owner along with project manager and finalize the prototypes. After finalization, represent prototypes to the development team.
- Do the testing of the features of project and assist the testing team in test case preparation.
- Prioritize requirements by working closely with project manager and business owner as not all requirements may be important and feasible considering the scope and deadline of the project.
- Validate that the developed products meet the requirements and confirms that a solution based on the requirements would meet customer needs and achieve the business objectives.

#### **Web Design Intern**

**Apr 2019 – Jun 2019**

#### **Cre-Art Solution**

- Gain hands-on experience in front-end web development.
- Collaborate with the design and development teams to understand project requirements and user needs.
- Create wireframes, mock-ups, and prototypes for mobile and software applications.
- Participate in brainstorming and problem-solving sessions.
- Assist in coding, testing, debugging, and maintaining web applications.

#### **Volunteer**

---

#### **Calgary Public Library, Volunteer**

- As a volunteer help Calgarians build learning skills, make stories come to life, deliver Library materials, help patrons explore computer technology, and much more.

#### **Smt. S. R. Patel Engineering College, Volunteer**

- Led the team for an arts and crafts competition.
